

YOUR WI-FI SECURITY CHECKLIST

Is The WI-FI In Your Dental Office Secure? Could Outsiders Be Viewing Your Confidential Messages?

WI-FI Service from Veltec Networks helps your practice be more productive. We can ensure that it securely serves both your employees and your patients/visitors. We'll set up a separate system for your reception area, so your patients and visitors can access their mobile devices without viewing your messages and data.

How Secure Is Your Wireless Network?

Take Our Short Quiz To Find Out.

YES / NO

- ☐ ☐ **Does your practice have 2 separate SSIDs?** (one for your patients/visitors and one for your employees)
- ☐ ☐ **Do you use an enterprise-based router?**
- ☐ ☐ **Does your router provide UTM services such as gateway antivirus and data intrusion prevention?**
- ☐ ☐ **Do each of your networks require unique passwords?**
- ☐ ☐ **Have you verified that your patients/visitors cannot access your confidential data?**
- ☐ ☐ **Have you changed your network passwords within the last 60 days?**
- ☐ ☐ **Can you manage your bandwidth usage?**
- ☐ ☐ **Do all of your computers have security solutions and antivirus in place?**
- ☐ ☐ **Is your firmware up to date?**
- ☐ ☐ **Have all network and software vulnerabilities been patched?**

If you answered "no" to any of these questions, it's time for you to secure your Wi-Fi. Contact the IT Security Experts at Veltec Networks at (408) 849-4441.
